

CARBON REDUCTION PLAN

We are building upon our existing actions and ISO 14001 accreditation with new measures to reduce the carbon footprint from our business activities.

As part of our overall approach, we are committed to continuous improvement in the management and reduction of energy consumption and waste to reduce carbon emissions.

Basic principles of our carbon-reduction program

Our carbon-reduction program is based on two primary principles:

- Reduce the amount of carbon generated as far as practicably possible, across numerous business activities
- Invest in certified carbon offset schemes on behalf of our customers, to offset the carbon footprint generated when moving their consignments

Our carbon reduction program uses a number of initiatives across various business activities designed to reduce impact on the environment and reduce our carbon footprint.

Integrated management policy

During 2019 we updated our integrated management policy to meet the requirements of ISO9001:2015 and ISO14001:2015 and evaluated the environmental impact and risks arising out of our operations in order to protect the environment.

A management improvement plan was developed to ensure continual improvement of the management system and the company's performance by:

- Reducing waste within the business
- Conserving energy
- Reducing CO2 emissions

The updated policy committed the business to consider planned and new developments in our processes, products and services that may affect the environment or risks levels and to meet all compliance obligations.

CARBON REDUCTION PLAN

Carbon Neutral Plan

We are committed to becoming carbon neutral by 2040 reducing our emissions to 14,765 by 2026, a reduction of 15%

Baseline Emissions Reporting 2020

Emissions	Total (tCO ₂ e)
Scope 1	189
Scope 2	178
Scope 3	15,940 (of which) Upstream transportation and distribution 13,868 Waste generated in operations 478 Business travel 797 Employee commuting 638 Downstream transportation and distribution 159
Total Emissions	16,306

Current Emissions Reporting 2021

Emissions	Total (tCO ₂ e)
Scope 1	201
Scope 2	189
Scope 3	16,980 (of which) Upstream transport distribution 14,773 Waste generated in operations 509 Business travel 849 Employee commuting 679 Downstream transportation and distribution 170
Total Emissions	17,370
