

## Customer Case Study

The company is based in Detroit, Michigan and is one of the world's largest automotive manufacturers. They employ over 180,000 associates across the globe. The company has produced over 10 million vehicles, resulting in revenues exceeding \$140 billion. TVS has worked continuously with this manufacturer for over 25 years and has become a trusted partner in their Supply Chain.

In 2016, the customer constructed a 1.1 million SF, State-of-the-art Logistics Optimization Center located in Wentzville, Missouri (approximately 40 miles west of St. Louis). TVS was chosen to occupy and manage this new facility. Working closely with the customer, TVS executed the consolidation of three existing warehouses into the new LOC in less than one week, without any disruption to the manufacturer's assembly line.

### THE TVS SOLUTION

- Off-site Just in Time Materials Management
- Innovative Kitting and Sequencing Solutions
- Value Added Sub-Assembly
- Industry leading error proofing technology
- Reverse Logistics & Container Management
- Rack Repair and Fabrication
- Quality Containment – Inspection and Rework

### CUSTOMER BENEFITS

Inventory Accuracy  
Exceeding 99%

On-hand Inventory Reduced  
from Days to Minutes

Increased Productivity  
through JIT Delivery Systems

Consistent Part Availability

Real-Time Inventory  
Management

Transparent Part  
Proliferation

*Collaborate.  
Innovate.  
Accelerate.*
