

# PROTECT YOUR CARGO

The importance of insuring your goods

## WHY AND FOR WHAT PURPOSE INSURE GOODS

### TRANSPORT INSURANCE IS ONE OF **THE MOST IMPORTANT ASPECTS TO TAKE INTO ACCOUNT WHEN CONTRACTING AN INTERNATIONAL FREIGHT TRANSPORT SERVICE.**

Although it may seem unbelievable that goods are exposed to multiple risks during transport, when an accident occurs and the incident is analysed, unfortunately, in most cases, reality outweighs fiction. ***(thefts, fires, explosions, breakdowns associated with storms, floods and other atmospheric phenomena), which result in enormous damage and management problems for the company.*** If we do not have an insurance policy with sufficient guarantees, ***The result is a high economic cost and in many cases even problems with the client,*** for failure to receive the goods within the agreed period.

**TVS SCS international Freight (SPAIN)** handles and transports goods with the utmost attention, effort and care in all the processes we carry out, but we always ***advise a good transport insurance in accordance with the value of the goods and the risk analysis of the whole operation,*** For this reason, we have a team of specialist transport insurance advisors who can offer you the best cover for each mode of transport and product. ***The risk is analysed*** depending on other factors such as the situation in the country of destination, dates of transport, etc. ***and a tailor-made insurance policy is offered which guarantees an immediate solution in the event of a claim.***

# TRANSPORT ACCIDENT RATE DATA

	GLOBAL	OCEAN	AIR	LAND
<b>Annual claims recorded with breakage or total loss of Goods</b>	<b>+35.600</b> Annual claims recorded with breakage or total loss of Goods	<b>+72</b> Annual shipwrecks and structural damage to container ships	<b>+37</b> Annual air casualties	<b>+30.000</b> Annual claims in Europe
		<b>+377</b> Annual incidents of container losses		

Although total losses decreased last year, the number of reported marine casualties or incidents remained constant (3,032 in 2022 compared to 3,000 in 2021). The British Isles recorded the highest number (679). Machinery damage or breakdown accounted for nearly half of all incidents worldwide (1,478). Also, more than 200 fires were recorded in 2022 (209), the highest number in a decade, making it the third highest cause of incidents globally, with a year-on-year increase of 17%.
